

Studsetter

Description:

The Stud Setter is a tool for mounting studbolts. You mount it on an electrical spanner, and screws the bolt down to its position. To take it off the bolt, you drive reverse with the spanner. There is a piece of POM mounted on the tool who can drive free around the tool, so you can hold on to that when running.

For safety use:

- *Safety glasses*
- *Safety footwear*
- *Ear protection*
- *Head protection*
- *Do not wear gloves – Rotating tool*

Quick specs.:

Standard sizes: M16, M20, M24, M30, M36, M39, M42

Standard for 1/2" spanner

Any size can be made upon request

Instruction:

1. Place the unit in the electrical spanner
2. Use the electrical spanner to insert studbolts
3. Hold one hand on the electrical spanner, and the other hand on the black piece of POM
4. Screw down your studbolts
